

WHY IT WORKS

Our team has been automating accounting processes for 20+ years

Accounting Link works with today's most popular accounting packages.

Accounting Link integrates shop management systems with accounting systems. Our product is configured and supported by accounting professionals who understand automotive repair. With just a few clicks, the day's activity is verified and transferred to your accounting system. Accounting Link is flexible and tailored specifically to the accounting needs of the customer. Simplifying your accounting allows you to focus on building your business while feeling confident in your numbers. Accounting can be complex, but it doesn't have to be!

User Friendly

Accounting Link will work with your existing chart of accounts, or we can provide an industry standard template to help you get started. The validation process takes only minutes to complete each day. This seamless process ensures the data is reliable and accurate in the least number of steps.

Better Control

Control what goes into the accounting system. Alleviate errors by validating data and making corrections before transferring to an accounting system. Using Accounting Link to help implement best practices for single or multiple shops keeps the numbers consistent and accurate.

Flexibility

Our product allows the books to be done from anywhere whether it be your home or remote office. You decide how much, or as little detail is needed in the accounting software. Get a complete, accurate, and up-to-date picture of your business' financials within minutes.

Cost Benefits

Save time and personnel costs by eliminating the need to rekey transactions into the accounting system. Allow your staff to focus on making decisions based on the numbers rather than collecting and manually keying in the numbers.

Sound too good to be true?
Call us and let us prove just how easy things can be.

HOW IT WORKS

- Step 1** ● **Order**

Tekmetric places an order, via our online order form, sharing your shop's details. An email confirmation is sent back to Tekmetric confirming we have processed the order.
- Step 2** ● **Schedule**

We reach out to you and coordinate a specific time that works for you to customize Accounting Link to your specific needs.
- Step 3** ● **Configuration and Training**

Back Office will help configure Accounting Link to fit into your current processes. With flexible configuration options, we can meet complex requirements and can even offer advice on best practices to improve your current processes. Using live data, we walk you through the integration and answer any questions that you may have.
- Step 4** ● **Support**

Our team is available via phone, email, or chat to provide additional support whenever needed. We pride ourselves on delivering exceptional service with our customer's success in mind.

Let us be the solution to help streamline your accounting process.
